## PVI-5000-OUTD PVI-6000-OUTD

## GENERAL SPECIFICATIONS OUTDOOR MODELS

PVI-5000-OUTD-US

PVI-6000-OUTD-US

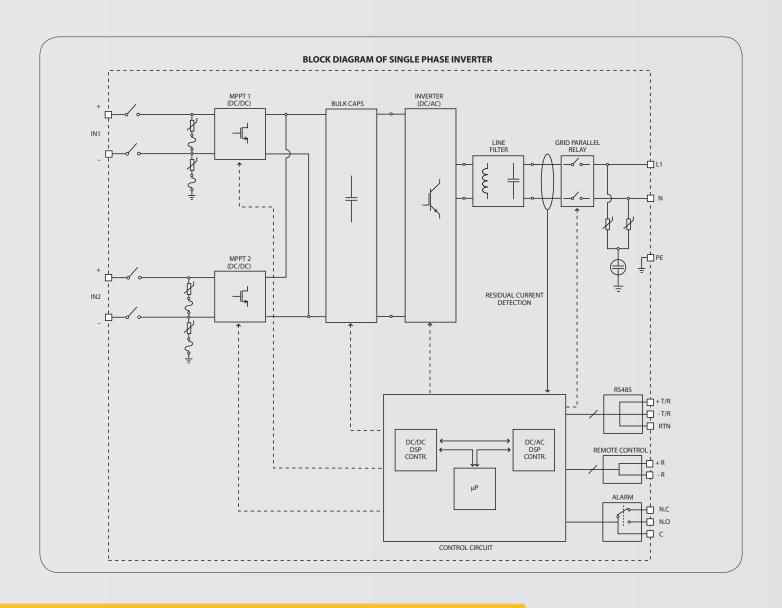

Designed for residential and small commercial PV installations, this inverter fills a specific niche in the Aurora product line to cater for those installations producing between 5kW and 25kW.

This inverter has all the usual Aurora benefits, including dual input section to process two strings with independent MPPT, high speed and precise MPPT algorithm for real-time power tracking and energy harvesting, as well as transformerless operation for high performance efficiencies of up to 97.1%.

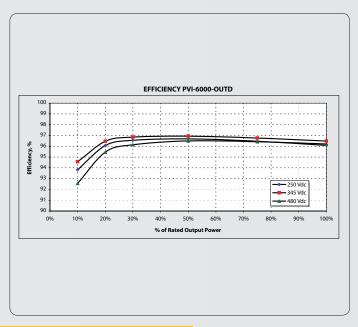

The wide input voltage range makes the inverter suitable to low power installations with reduced string size. This outdoor inverter has been designed as a completely sealed unit to withstand the harshest environmental conditions.

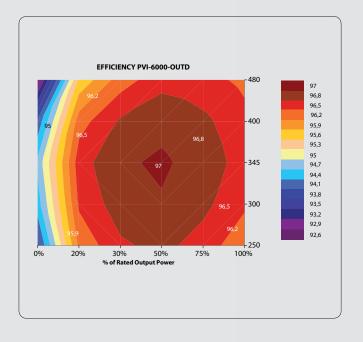

## **Features**

- Single Phase 208/240/277 Vac
- Dual input section to process two strings with independent MPPT, optimize energy harvesting from multiple arrays oriented in different directions
- Widest input range in industry
- High speed and precise MPPT algorithm for real time power tracking and improved energy harvesting
- High efficiencies deliver more energy. Flat efficiency curves to ensure consistent and stable performance across the whole input voltage and output power range
- Transformerless operation for highest efficiency
- Anti-Islanding Protection
- Watertight NEMA 4X (IP65) enclosure
- Available only with integrated DC switch in compliance with US standard
- RS-485 communication interface (for connection to laptop or datalogger)
- Compatible with PVI-RADIOMODULE for wireless communication with Aurora PVI-DESKTOP

## Block Diagram and Typical Efficiency
